

Project Management Platform Workflow & Functional Specification

This document outlines the proposed workflow, project lifecycle, functional modules, statuses and automation opportunities for a custom project management platform.

Project Lifecycle Workflow

1. New Request

- Customer details, site details, scope of works, attachments, initial notes.

2. Quoting

- Prepare labour estimate, materials, supplier costs, EU pricing, margin calculation, internal approval.

3. Quote Sent

- Quote issued to customer for approval.

4. Approved

- Purchase Order received and attached. Deposit status recorded.

5. Waiting for Scheduling

- Approved jobs queued for scheduling.

6. Scheduled

- Allocate installers, schedule calendar, check staff availability, send notifications.

7. Project Workspace

- Manage documents, installation tasks, notes, photos and communications.

8. Field Execution

- Track time, attendance, materials, notes and photos from field staff.

9. Installation Complete

- Installation marked complete.

10. QA Inspection

- Automatic QA task created. Pass/fail with defects and photos.

11. Completion Certificate

- Issued once QA passes.

12. Final Costing

- Collate labour, materials, variations and profitability.

13. Ready for Invoice

- Export invoice details to Xero.

14. Closed

- Project completed and financially closed.

Core Functional Modules

- CRM

Customers, contacts, sites, communication history.

- Quote Management

Quote builder, pricing, revisions, PDF generation.

- Project Management

Dashboard, tasks, milestones, notes, documents.

- Scheduling

Calendar, installer allocation, leave conflict detection.

- Field App

Clock on/off, attendance, materials, notes, photos, variations.

- Document Management

Drawings, SWMS, certificates, permits, photos.

- QA & Compliance

Inspection checklists, defects, completion certificates.

- Finance

Job costing, profitability, Xero integration.

- HR

Annual leave, sick leave, unavailability, certifications.

- Administration

Users, permissions, templates, pricing tables.

Project Status Flow

New Request → Quoting → Quote Sent → Awaiting Approval → Approved → Waiting for Scheduling → Scheduled → In Progress → Installation Complete → QA → Final Costing → Ready for Invoice → Closed

Automation Opportunities

Trigger	Automatic Action
New project	Create project folder and project number.
Quote approved	Request Purchase Order.
PO received	Move to Waiting for Scheduling.
Job scheduled	Notify installer and customer.
Installation complete	Create QA task.
QA passed	Generate Completion Certificate.
Final costing complete	Send invoice details to Xero.
Invoice paid	Mark project financially complete.
